INSTALLATION GUIDE

1

## UPLOAD MODULE FILES TO SERVER

You can download the lastest files from our GitHub repository https://github.com/StarEditions/magento-ordersync.git

Place the files in your project directory in project_dir/app/code/Letsprintondemand/OrderSync/

2

ENABLE MODULE

Run the following commands to enable the module
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy (-f if in developer mode)

Settings

Store Name [store view] : magento_dev_test

API URL [store view] : https://app.letsprintondemand.com/api/v1/

Token [store view] : 5|qXyYdL6XXOBSc59NIkVm7K0831glqx4R7f4SuzV7

Update Store Endpoint : [Update Store Endpoint]

Order status updates will be pushed to this URL.
If the fulfilment status is not being updated, click on the button above to restore the endpoint URL

Vendor (star-editions) [store view] : star-editions

Please note that all products fulfilled by Star Editions, must have the correct vendor selected. Orders will only be synchronised with items set to the star-editions vendor

3

CONFIGURE MODULE

Setup the configuration in Magento admin **Stores > Configuration > Let's Print On Demand > Auto Sync Orders**
Fill in the Store Name, API URL and Token provided to you by your account manager.
Set the vendor to star-editions. You might need to first setup a Manufacturer under the store's product attributes
Any products that are fulfilled by Star Editions, must have the manufacturer attribute set to star-editions
